ABOUT ME

I am a full stack developer with over 4 years of experience contributing to the development of web and desktop applications in the IT sector. My interest has always revolved around the javascript stack in combination with cloud computing. I enjoy cooperative work, challenges, being in constant learning, and taking the initiative to achieve the objectives in the assigned projects.

WORK EXPERIENCE

Oct 2020 - Present

Tech Leader
Full Stack Developer

Work tools:
AWS, Node.js, React, Python, Angular, Git, Java, Figma, Jenkins, Docker, Terraform, SonarQube, Postman, CastleMock.

Banco de Occidente - Grupo aval

- I participated in 2 digital projects of websites for the approval of a personal loan online.
- I reduced the loading time of serverless processes such as the cold start of lambda services in AWS.
- I developed a library in order to have a design consistency on the websites based on the bank's Design System.
- I provided training and best practices to programmers and new joiners in my team.

Jan 2020 - Oct 2020

Freelance
Full Stack Developer

Work tools:
Node.js, Angular, MongoDB, Hosting VPS, Git, Bash, Docker, Postman

CreativeMood

- I planned and set up infrastructure resources for VPS hosting.
- I fixed security vulnerabilities such as clickjacking and weak encryption between client and server through SSL.
- I collaborated in the construction of the RESTful API.
- I participated in concept meetings for design, product, and UX to align feature specifications.
- I developed user interfaces according to the design.
